

InSolare Energy Pvt Ltd

Installing rooftop solar

CASE STUDY

Summary

Factory was using Diesel generation. By using Solar the diesel usage is reduced by over 30%

Objective of Intervention

Install 900 KW of solar on factory rooftop at manufacturing facility in Bihar

Type of Intervention and Location

Installing Rooftop Solar at Industrial factory in Bihar

Description of Intervention

Solar system installation was done on available rooftop, this was completed in multiple phases to cover all available areas.

Intangible or Tangible Benefit

The power supply at the factory has been stabilized and the continual availability of power makes it safer and less disruptive for operations.
