# Waste Management – The Issues and the solution

## Issues

- Inventory of Waste (Waste reduction opportunities)
- Market/Demand creation for recycling
- Value addition/extraction to waste material
- Co-processing
- Bio-energy

## Barriers

- Lack of Policies for Consumer Durable Waste
- Energizing, Educating and creating awareness
- Segregation of waste

## Output

- Inventorizing waste from different sectors
- International and national case studies with focus on Waste Management solutions
- Capturing innovative waste recycling strategies

# Way Forward

- Peer **consultations** for project
- Making the **business case** for waste management by preparing a ready reckoner of international best practices
- **Engaging** with the government and community
- **Site visit**
- **Webinars** with experts towards an integrated approach on CSR
- Implementing **a pilot project** to prove the concept
